ABSTRACT

[0057] A system and method for generating a collection of speech generation commands associated with computer readable information is provided. The method includes partitioning the computer readable information into at least first and second portions of computer readable information. The method further includes generating a first collection of speech generation commands based on the first portion of computer readable information in a first computer. Finally, the method includes generating a second collection of speech generation commands based on the second portion of computer readable information in a second computer.
